

Adapter eMMC/JTAG for Riff BOX 2 - RC2000

Product ID: 21231

Price: **10.00 EUR**Product weight: **0.10 kg**

Description:

Adapter eMMC/JTAG for Riff BOX 2 - RC2000 allows a very simple repair phones by JTAG using IDC20 pin connector known from previous riff but offers also support for eMMC using latest 30 pin connector (IDC 30 pin). By this you can repair phones with blocked JTAG access (GT-i9300 / N7100 / N719 / N7102, etc.), repair phones with damaged JTAG points/pads (access to ROM2 by EMMC) or read/write EMMC applicable for the data recovery/analysis. Using the adapter you can perform format EMMC or low-format (in case of damage EMMC), CMD42 Lock/Unlock/Password reset or Samsung eMMC Factory Format. Our adapter allows you to connect in ISP mode (directly onto your phone without removing the EMMC) or Direct (by removing the BGA soldering and the corresponding memory fields or using adapter).
