AMAOE Mbga-B5 BGA reballing platform with stencils for CPU

Product ID: 22936

Price: **57.00 EUR**

Product weight: **0.50 kg**

Description:

AMAOE Mbga-B5 BGA reballing platform with stencils for CPU- Reballing platforms are high-quality products that enable precise re-creation of balls connecting the upper and lower parts of the motherboard and for removing glue. Made of high-quality synthetic stone, resistant to high temperatures and quickly cooling down. Platforms equipped with very strong magnets that prevent movement during soldering work using templates / reballing sieves. The screen template is a product made of steel resistant to high temperatures and deformation.
