

Aoyue 638 - board inspection system

Product ID: 14715

Price: **349.00 EUR**

Product weight: **8.00 kg**

Description:

Aoyue 638 - board inspection system is a device allowing the inspection of motherboards. With an integrated camera with a lens with variable magnification and a maximum of approximately 100x you can see exactly even the smallest connection between the pins of integrated circuits, as well as the state of soldering BGA chips. The handle is attached with 7" TFT color monitor on which you can easily see the place of inspection, the platform features a curved LED lamp illuminates the place of the inspection arm.
