

Aoyue BGA Station 9001

Product ID: 16911

Price: **6149.00 EUR**

Product weight: **50.00 kg**

Description:

Aoyue BGA Station 9001 is designed to work with different size BGA, QFP and others. It has an advanced optical system "SPLIT VISION" and a precise positioning system solder system with which you can easily and safely replace every system. The built-in LCD monitor allows for precise adjustment of the position of the solder on the board. The five available profiles of heating and additionally the possibility of changing the parameters allow you to adjust parameters of the station to any needs. In addition the station has Soldering irons 70W. It is designed for lead-free soldering. Indispensable when replacing the motherboard chipsets, CPUs, GPUs and other demanding precision positioning.
