

## AVR Programmer

---

Product ID: 1037

Price: **21.04 EUR**Product weight: **0.12 kg**

### Description:

AVR Programmer it's a very good device programmer. If you are looking for a simple but powerful programmer you are right, it's here. AVR it's a parallel programmer software with a user friendly GUI framework available for Windows95, 98, XP, 2000 & NT and Intel Linux. Its purpose is reading and writing Atmel AVR using system provides a standard In System Programming (ISP) connector. The PC interface is through the Parallel port, and makes use of the same pinout as the STK-200 programmer from Kanada Systems. The STK-200 programming cable is very popular, and almost every ISP download software (Except ICCAVR's inbuilt chip programmer) supports it.
