Blade holder Flying Eagle to remove the adhesive from the LCD

Product ID: 17283

Price: **4.99 EUR**

Product weight: **0.10 kg**

Description:

Blade holder Flying Eagle to remove the adhesive from the LCD is made of durable plastic bracket for mounting the blade Flying Eagle, which protects the work of a technician during removal of residual glue on the broken panes displays or touch screens. Glue that remains after removing the (old) must be safely removed prior to application of a new UV glue LOCA / OCA and the installation of the new touch screen. The blade holder will optimize the work and protect not only the display but also a service technician during the removal of remnants of the old adhesive.
