Cover for the keys blocking radio waves - protection before scanning

Product ID: 15981

Price: **12.00 EUR**

Product weight: **0.10 kg**

Description:

Cover for the keys blocking radio waves - protection before scanning is a cover acting as a Faraday cage, after inserting the keys to cover in an effective way you secure your car - because it will prevent scan signal it sends your car keys. The key-no access - regardless of whether it comes to kardy code, or built-in transponder keys - uses radio waves to work. There is no risk that someone will intercept the signal to get to your car.
