Data Recovery from mobile phone or tablet

Product ID: 21684

Price: **179.00 EUR**

Product weight: **0.20 kg**

Description:

Data Recovery from mobile phone or tablet is a service offered to people and companies who randomly lost all data they collected inside a phone, tablet and want to recover them all. No matter for us if data was lost as a result of mechanical damage (telephone flooded, broken or crushed, ie. after the fall) or logically damaged (accidentally erased data, system crash, format of the memory card in phone).

NOTE: We analyze the data readings made with 3 world-class independent fully licensed investigative tools, ie UFED Cellebrite PA, MSAB XRY / XAMN, Oxygen Detective Forensic. Thanks to this, you can be sure that no data has been omitted in your report!
