

## Drone data recovery

---

Product ID: 23177

Price: **299.00 EUR**

---

Product weight: **0.20 kg**

### Description:

Drone data recovery is a service that involves recovering data, including flight history, geographic locations, and recorded footage. As drones become more widely available, there is a growing need for specialized analysis of the contents of the drones' memory, especially to detect potential illegal activities and ensure compliance with legal standards.
