

## Drying / heating oven ZM-101-1

---

Product ID: 21331

Price: **409.00 EUR**

---

Product weight: **120.00 kg**

### Description:

Drying / heating oven ZM-101-1 are designed for professional electronic services and companies involved in electro-installation. Their main task is to anneal the PCB, PBA and electronic components SMD, BGA etc. before soldering or for heating LCDs. Annealing allows dry elements so that the solder did not undergo damage such as delamination, internal cracks, sail tin from the core, etc. Stay in the oven also reduces the thermal shock, which is formed by soldering.
