EasyConnect v2.0 adapter for JAF®/UFS/Mt-Box cables 3in1

Product ID: 5894

Price: **12.00 EUR**

Product weight: **0.02 kg**

Description:

EasyConnect v2.0 adapter for JAF®/UFS/Mt-Box cables 3in1 it's latest edition of our world known EasyConnect adapter that additionally contains USB connection cable that solves all problems for APE on JAF® and other problems in flashing latest Bb5/BB5+ on JAF® or UFS (devices that don't have external power supply). Of course all previous functions are also implemented - so help customers that got many problems in putting phone into Local mode by existing cables. Since we used two separate RJ connectors - RJ48 10 pin for MTBOX/GTI and RJ45 for JAF® and UFS you can connect to it as well as original MT-BOX cables as UFS cables. After connecting through EasyConnect adapter you will be able to put phone into Local mode without any problems instead of normal powering on phone.

NOTE: Available also older version of cable:

EasyConnect
