FE ADVANCED 2020 adapter for Flash Extractor to connect MR adapters

Product ID: 22225

Price: **99.00 EUR**

Product weight: **0.10 kg**

Description:

FE ADVANCED 2020 adapter for Flash Extractor to connect MR adapters is an additional adapter that allows you to connect all types of MR adapters to Flash Extractor (SoftCenter) for reading through NAND using fixed VCC. The adapter has a built-in adjustable VCC voltage in the range of 1.8V to 3.2V (jumper) and 2.0V to 3.6V (potentiometer), powered from the MiniUSB 5V port - this allows to easily see and fix errors on NAND ECC on chips that require lower voltage. The ADVANCED version is characterized by the possibility of supplying memory with a voltage in the range of 1.80V to 3.30V (0.05V pitch) directly from the Flashextractor NAND Reader - option available from version 4.66.
