## Ferrous Chloride - 250g

---

Product ID: 13862

Price: **2.08 EUR**

---

Product weight: **0.30 kg**

### Description:

Ferrous Chloride - 250g an etcher designed for etching printed circuits, copper and alloy steels. Recommended working temperature from 20°C to 40°C. Higher temperatures quicken the etching process but increase the undercutting effect.
