

## GMDSOft MD-BOX

---

Product ID: 23244

Product weight: **1.00 kg**

### Description:

GMDSOft MD-BOX is the forensics hardware for extracting data directly from the mainboard using JTAG interface and MD-NEXT software. Various mobile CPUs are supported with fast and robust extraction features under the assurance of write protection and evidence integrity. When the mobile device has damage on the external parts, but the mainboard still works, the examiner can connect the mainboard to MD-BOX through JTAG interface. Then, the data can be extracted by JTAG extraction menu in MD-NEXT.
