

GMDSOft MD-READER

Product ID: 23243

Product weight: **1.00 kg**

Description:

GMDSOft MD-READER is the forensics hardware for extracting data directly from the flash memory detached from the mainboard of a digital device. The detached flash memory needs to be mounted into eMMC/eMCP memory sockets bundled with MD-READER. Then, the data extraction can be done under the assurance of write protection and evidence integrity at the Chip-off menu in MD-NEXT.
