

## JC iFace Flex Cable for iPhone 11 Pro

Product ID: 22740

Price: **25.49 EUR**Product weight: **0.30 kg**

### Description:

JC iFace Flex Cable for iPhone 11 Pro - designed to repair FaceID. It is a flexible cable / tape that allows you to copy data from the original cable on which face ID does not work to the new one. A Face ID JC Pro1000S programmer is essential, and it must be used with JC dot matrix detection. You don't need to disassemble the original chip, you just need to assemble the cable. Designed for JC, JC Pro1000S dot matrix detection module and JC VIS programmer for iPhone.
