

JC V1SE Baseband & Logic EEPROM Programmer for iPhone + 8 PCB

Product ID: 22776

Price: **189.00 EUR**Product weight: **0.80 kg**

Description:

JC V1SE Baseband & Logic EEPROM Programmer for iPhone + 8 PCB is a powerful EEPROM chip repair programmer, the solution for repairing the Proximity Light Sensor, True Tone Display, Multi Touch and Vibrator compatible issues of replacement parts since ios 11 upgrade. In comparison with previous generations, it now has a builtin read/write/edit function for logic chip and baseband. With this device you can easily backup data from original parts and rewrite to replacement parts, no more fear for compatibility issues.
