

Jovy iSolder-40 soldering station

Product ID: 21355

Price: **119.00 EUR**

Product weight: **1.40 kg**

Description:

Jovy iSolder-40 soldering station is latest invention for lead free soldering with wise touch technology and concept of "variable power for variable temperatures". Invincible, control using the tip for sensing the thermal energy requirements for the target precisely when it touches the solder joint surface, and prevents overshooting without any calibrations. Intelligent, the auto-power regulation and recovery control provides the different temperature levels needed for melting any type of solder material alloys at any volume. Auto sleep mode and auto standby mode implemented for power saving and longer tip life time. Inconceivable, the easiest operating method exists for soldering stations, by two colour led indicators with four operating modes. iSolder-40, is the combination of fashionable design and ease of use hand –piece for more control and comfort.
