Product weight: **6.80 kg**

### Description:

Lamp with magnifier (127mm) and stand 8066-2BHC-1C 8D is a professional lamp mounted on a moveable arm that protects your eyes when you work for repairing field. This table lamp comes with a high-frequency 4200Hz lamp without frequent sparking, avoiding harmful effects on eyes after long-time working, since long-time work under deficient light at normal 50Hz/60Hz can cause short eyesight and many eye diseases. The 8x magnifier brings the work up close to you for much easier working. It is a very useful tool for people who are doing repairing business.
