MT NOR Adapter for MediaTek 6261DA SoC

Product ID: 22557

Price: **179.00 EUR**

Product weight: **0.10 kg**

Description:

MT NOR Adapter for MediaTek 6261DA SoC is a programmer in the form of a USB key that allows access to data contained in the internal NOR memory embedded in MediaTEK (MTK) 6261DA SoC. These processors (SoC) are most often found in budget phones, the so-called Features phones like Nokia 106 TA 1114, Nokia 108 RM 944, Nokia 105-2 RM 1133, Nokia 105 TA 1034 as well as many smartwatches. Due to the lack of an SPI or I2C access protocol, the only possibility of accessing the data after a device failure (e.g. breaking the motherboard to prevent access) was to perform a chip SWAP to a functional device. Our adapter revolutionizes data recovery from such cases - just after ChipOFF, place the processor in the adapter and connect the adapter to the USB to enable data reading.
