

NOR Adapter for Coolsand/RDA SC6533G

Product ID: 22920

Price: **219.00 EUR**Product weight: **0.20 kg**

Description:

NOR Adapter for Coolsand/RDA SC6533G is a programmer in the form of a USB key that allows access to data contained in the internal NOR memory embedded in Coolsand RDA SC6533G. These processors (SoC) are most often found in budget phones, the so-called Features phones like as well as many smartwatches. Due to the lack of an SPI or I2C access protocol, the only possibility of accessing the data after a device failure (e.g. breaking the motherboard to prevent access) was to perform a chip SWAP to a functional device. Our adapter revolutionizes data recovery from such cases - just after ChipOFF, place the processor in the adapter and connect the adapter to the USB to enable data reading.
