

## Programmer UFS / eMMC / eMCP NuProg-E

Product ID: 21723

Price: **1249.00 EUR**Product weight: **0.80 kg**

### Description:

Programmer UFS / eMMC / eMCP NuProg-E is a universal programmer (read / write / verification) for the memory eMMC / EMCP and also to the latest UFS IC (used in Samsung S6, S6 Edge, Note 5, S7, S7 Edge) . Programmer equipped with its own easy-to-use Windows software allows for full configuration in case of UFS memory access and in case of eMMC / eMCP allows also to access to RPMB along with standard UserData, Boot, GPP and CSD partitions.
