---

Product ID: 8130

Price: **15.00 EUR**

---

Product weight: **0.10 kg**

### Description:

Protection tape JOVY 30mm 10m it's special tape used with IR stations to protect IC that are not soldered/desoldered. During IR process if element are very small as modern uBGA IC it's necessary to protect all outside IC to not desolder/solder them again while working with IR. JOVY Tape it's similat to Kaptoon tape used in HotAir station to not damage balls under high density BGA etc. - this tape will allows you to forgot about such problems forever.
