Description:

Read lock code from third party applications in device with OTG - based on Android 4.x.x/5.x.x/6.x.x is a service based on a reading Lock code from third party application (CM Locker etc.)from delivered device. The service is non-invasive, it means that the phone does not need to have enabled USB debugging or programmer mode - does not make any changes to the phone, ie. We do not disassemble device, we do not interfere in the data and not upload anything to phone (Recovery etc.).
