

Reading the screen lock code (PIN / Pattern) on a Huawei phone

Product ID: 22584

Price: **119.00 EUR**

Product weight: **0.10 kg**

Description:

Reading the screen lock code (PIN / Pattern) on a Huawei phone enables safe reading of the screen lock code while saving the data. The service is non-invasive - the phone does not need to have USB debugging or developer mode enabled, or an unlocked Bootloader. At the moment, we support nearly 80% of models (including the latest P30, P30 PRO, P40) blocked by a PIN code (4 and 6 characters) or a Pattern code.
