Removal of the lock code on your phone with OTG based on Android 5, 6, 7, 8

Product ID: 22228

Price: **99.00 EUR**

Product weight: **0.00 kg**

Description:

Removal of the lock code on your phone (OTG based) - Android 5, 6, 7, 8 is a service where we removes the PIN, Paternlock or Password code from the start screen. The service also applies to removing the code on phones with the default encryption enabled - the model and the brand do not matter. The service is non-invasive, meaning that the phone does not have to have USB debugging or programmer mode enabled and is not dismantled.
