Set of SoC NOR adapters for MTK/SPD/RDA processors

Product ID: 22987

Price: **949.00 EUR**

Product weight: **1.00 kg**

Description:

Set of SoC NOR adapters for MTK/SPD/RDA processors the set includes adapters for Mediatek 6261DA, 2503DV and Spreadtrum SC6500 E/ES/FS, 6531E, SC6533G. These processors (SoC) are most often found in budget phones, the so-called Features phones like as well as many smartwatches and GPS trackers. Due to the lack of an SPI or I2C access protocol, the only possibility of accessing the data after a device failure (e.g. breaking the motherboard to prevent access) was to perform a chip SWAP to a functional device. Our adapter revolutionizes data recovery from such cases - just after ChipOFF, place the processor in the adapter and connect the adapter to the USB to enable data reading.
