Product ID: 9162

Price: **49.00 EUR**

Product weight: **0.10 kg**

Description:

SmartPhone SIM Recovery Pro 2 ER-341 professional SIM card management tool for home, office and professional use. It offers full access to the SIM card, giving the user increased control. This product has many applications for the following customers: - Spy companies, police, private investigators, general public, corporate companies and many more. In addition to SMS message retrieval, the device serves many other very useful functions including SIM card data backup, edit and restore, print out of SIM card information and allows you to set a list of fixed dial numbers. You can also view the last dialed number. Simply plug this device into a spare USB port on your computer along with any SIM card and run the forensic software supplied.
