

Table/Bracket Aoyue 668

Product ID: 16950

Price: **140.00 EUR**

Product weight: **3.00 kg**

Description:

Table/Bracket Aoyue 668 is a versatile, multi-PCB holder to work with PCB of different shapes. Especially recommended when using the preheater, as it prevents deformation of the PCB during soldering and provides comfort and safety for the user. This particular model holder was originally designed as an integral part of the heater Int883, but thanks to its versatility and stability, it was decided to sell it as a separate product. For users who already have a preheater and looking for a solid grip to the PCB, Aoyue 668 is the ideal solution.
