## TBK 228 Mobile Dryaer

---

Product ID: 21757

Price: **419.00 EUR**

---

Product weight: **62.00 kg**

### Description:

TBK 228 LCD Mobile Dryer is designed for professional electronics and electronics repair and maintenance companies. Their main task is to preheat the bodies to allow easy separation as well as for heating electronic components such as SMD, BGA etc. before soldering. The heating allows the components to be dried so that they do not undergo any damage such as delamination, internal cracks, stagnation of the tin from the core, etc. The oven also reduces the temperature shock that results from soldering.
