Tester for Tristar / Hydra for iPhone/iPod/iPad v3 (Lightning dock)

Product ID: 22254

Price: **129.00 EUR**

Product weight: **0.10 kg**

Description:

Tester for Tristar / Hydra for iPhone/iPod/iPad v3 (Lightning dock) enables error-free determination of whether the Lightning socket is damaged on your iPhone / iPod or iPad and offers testing of Tristar / Hydra IC. Tristar is a chip responsible for communication and correct charging process - communicates with the charger before allowing the phone to be charged and often causes slow charging or lack of it. Damage is most often caused by connecting to the original Apple charger. Its other names are e.g. U4001 iPhone 7 / iPhone 7 Plus), U4500 (5Se, 6, 6S), U2 / U6000 / U1300 (5C / 5S), U5900 (5G)
