The automatic UYUE X5 PRO 5in1

Product ID: 22333

Price: **1729.00 EUR**

Product weight: **54.00 kg**

Description:

The automatic UYUE X5 PRO 5in1 device is another successful model of this brand after laminator X1 / GM928 designed for repair of flat and curved displays with diagonal up to 9.2 "of the following types: TFT, IPS, Retina, Super LCD, OLED, AMOLED, Super AMOLED, Clear Black. To carry out the process of connecting an efficient display with a new fast device, it requires no other elements than connecting to the power supply. The compact dimensions of the device compared to above average capabilities make the device a distinctive model on the market in the class of devices. There is therefore no need to purchase additional compressors and vacuum pumps! The device has integrated modules in one housing: vacuum-pressure laminator, autoclave, UV lamp (new), compressor and vacuum pump.
