TT20 thermostatic chamber

Product ID: 22589

Price: **1499.00 EUR**

Product weight: **105.00 kg**

Description:

TT20 thermostatic chamber is an economical solution that allows you to maintain a specific temperature. The TT20 device allows you to adjust the temperature from -18C to + 100C (depending on external conditions) ensuring a high standard of temperature keeping and unparalleled flexibility. The illuminated chamber (LEDs) and the built-in grommet allow you to place other devices in it and control their parameters. The device can be connected to a computer and control the entire process directly from the PC. The device was made by the manufacturer according to our guidelines and checked in our laboratory for data readings (NAND), disassembling the bodies and other works for over a year!
