

Ultrasonic cleaner DK-1400H 240W

Product ID: 22299

Price: **441.00 EUR**

Product weight: **12.00 kg**

Description:

Ultrasonic cleaner DK-1400H 240W is an irreplaceable device for fast and efficient cleaning of non-mechanical elements in electronics but also in medicine, jewelry, optics. Thanks to the washers (ultrasonic baths) we save time, and the cleaning process itself becomes precise and takes a few seconds. The washer uses high frequency radio waves, causing the so-called cavitation. This leads to high energy molecules, which contributes to giving them momentum and strength capable of breaking down even heavy dirt and tear them away from the ground.
