Universal cable EDL (Deep Flash Mode) microUSB and Type-C

Product ID: 21749

Price: **12.00 EUR**

Product weight: **0.10 kg**

Description:

Universal cable EDL (Deep Flash Mode) microUSB and Type-C allows to put the phone in a deep flash mode when the faulty handset cannot enter fastboot mode through the volume down key and power button combinations. By using EDL Deep flash cable you can work with damaged deeply phones and enter into 9008 mode.
