

YIHUA 3005D-II dual adjustable DC power supply

Product ID: 17289

Price: **129.00 EUR**Product weight: **13.00 kg**

Description:

YIHUA 3005D-II Dual adjustable DC power supply is a dual-channel DC power supply with continuously-adjustable current and voltage, a large-screen LED-backlit display, and built-in knobs to help operators eliminate hidden dangers resulting from faulty adjustment. Channel II independent operations feature automatic tracking in series or in parallel. The third fixed output features selection between 2.5V, 3.3V, and 5V. Stunning in appearance and outstanding in performance, the machine is suitable for technology product development and use in laboratories, teaching, and electronics production lines as well as in essential communications industry equipment.
